

The Dynamics 365 Connector for DATEV from Inway Systems is an add-on for Microsoft Dynamics 365 Finance. It enables direct data exchange between Dynamics 365 and your tax consultant.

ACCOUNTING WITH DYNAMICS 365 ANNUAL FINANCIAL STATEMENT WITH DATEV

Simple data exchange between Dynamics 365 Finance and DATEV

Companies that create their accounting with Microsoft Dynamics 365 are usually supported in the preparation of the annual financial statements by a tax consultant or auditor who works with DATEV's accounting program.

The DATEV interface for Microsoft Dynamics 365 for Finance enables the direct exchange of data between these companies and their tax consultants.

With just a few clicks, all master data and all bookings of the general ledger and subsidiary ledger are transferred. The direct data exchange saves time and money, and facilitates the cooperation between the accounting department of the company and the tax consultant. Accounting can easily be performed in Microsoft Dynamics 365 FO. Through the data transfer, the annual financial statement is then simply prepared by the company's tax consultant or auditor.

HIGHLIGHTS

Improved collaboration

Direct data exchange improves cooperation between the accounting department and the tax consultant or auditor of the company. It enables direct reconciliation of the financial data with the annual financial statements.

You save time and money

The data is transferred fully compatible into the DATEV format. Manual changes and subsequent errors are avoided and thus save time and costs.

FUNCTIONS AND ADVANTAGES

- > **Export-Function:** With just a few clicks you can start the data export from master and transaction data of your financial accounting such as charts of accounts, G/L or subledger account postings and cost centers.
- > **Simple operation and configuration:** The interface is easy to operate and configure. With only a few details and settings, the DATEV interface can be used quickly.
- > **Full DATEV compatibility:** The data is DATEV-compliant and the data conversion can be read directly by DATEV.

Core functions:

- > Seamless integration in Dynamics 365 Finance
- > Simple preparation of the annual financial statements by your tax consultant/auditor through the direct data transfer
- > Transfer of full accounting from Dynamics 365 Finance into the accounting program of DATEV
- > The annual financial statement can be exported GDPdU-compliant and provided for the digital tax audit.

Important for:

- > Financial accounting employees
- > Tax consultant / company auditor

Technical requirement:

- > Microsoft Dynamics 365 for Finance and Operations
